Here is the big idea: NFT's, TRIBE, Staking

How this is different:

We did not air drop any tokens, all circulating supply has been organic through an IDO or Initial Decentralized Offering.

The old model of air dropping to "trustlines" is broken, thousands of trustlines set from multiple accounts before even having a Twitter account does not work. And does not convert to added value to the future holders of the token.

The new model is rewarding holders generously.

How do you know if you are in the right Tribe?

How do I know if these are my people?

Great question, and how do I know if these are NOT my people?

1. **You can never say the right thing to the wrong people (You will always be judged, it will always be looked at sideways, there will always be an angle.)**

2. **You feel like you can't do anything right**

3. **You are tolerated and not celebrated.**

When you are in the right Tribe?

1. **You will find out who truly loves you for who you are.**

2. **You can never say the wrong thing to the right people. (They will love you. They will take care of you. They will look for the best in you, regardless.)**

3. **You know you've found your Tribe when you feel accepted for who you are and they make your losses or gains their own.**Many times it is not just about discovering what your supposed to do, it is also where you belong in what you're supposed to do & then with who you are supposed to do it with.
